

LINDA VUONG

+1 408 685 1479 - lhvuong1124@gmail.com - lhvuong11.github.io/website

Engineer with experience leading technical testing projects, analyzing test data, developing technical documentation, and coordinating cross-functional teams. Proficient in Python, Java, C++, with experience improving testing workflows, reporting results, stakeholder communication, and ensuring regulatory and quality compliance.

TECHNICAL SKILLS

Programming: Python, Java, C++
Tools: Microsoft Excel, Microsoft Word, Adobe Acrobat
Technical: SAR Testing, RF Testing, SOP Development, Technical Documentation

EXPERIENCE

Element Materials Technology	Sept 2025 – Present
Lead Engineer Morgan Hill, CA	
- Led 8-9 engineers and technicians across multiple 4-6 month technical projects, coordinating testing, analyzing test data, and presenting results to support project deliverables and client requirements. - Prioritized daily testing and streamlined workflows to meet critical project deadlines while maintaining testing quality. - Drafted and submitted 3 primary reports, each with 10 supporting appendices, achieving 100% compliance with client requirements and internal quality standards. - Continued serving as Group Lead after completing my assigned projects, supporting fellow engineers and driving sustained team efficiency and operational excellence.	
Associate Engineer	May 2024 – Sept 2025
- Appointed Employee of the Month in May 2025 - Compiled and reported test results for 30+ total test models using Microsoft Word, Excel and Acrobat, improving data accuracy and supporting client deliverables. - Trained new hires in all aspects of SAR testing, as well as created new SOPs to further facilitate learning, illustrating attention to detail and the ability to clearly explain complex procedures.	
Associate Test Technician	Oct 2023 – May 2024
- Converted from Seasonal to Permanent Technician in Feb 2024 - Conducted and analyzed SAR/RF exposure testing and evaluations per regulatory specifications for 5+ technologies (UMTS/LTE/NR/WLAN/WIFI/BT/NB-UNII/UWB), ensuring compliance and safety.	

EDUCATION

San José State University	Expected to graduate August 2027
M.S. Informatics	
University of California, San Diego	Graduated August 2023
B.S. Mathematics-Computer Science	
Relevant Coursework: Data Structures and Object-Oriented Design (C++/Java), Math and Analysis of Algorithms
